Driver's license: B

PROFILE

Results-oriented and adaptable full-stack developer with a strong passion for problem solving and continuous learning. Fluent in English, Swedish and Arabic, I have excellent communication skills that enable effective collaboration both independently and in teams.

With a degree as a system developer from the Yrkesakademin Academy and practical experience in creating advanced solutions, I am eager to use my skills and make a valuable contribution to your organization.

EXPERIENCE

Jahopp AB / Internship

JAN 2023 - MAY 2023, Distance

Developed a chart library that provided a quick deployment dashboard to improve the administration of web-based courses and programs.

Expanded functionality by ensuring hassle-free packaging and deployment through a repository and NPM.

Tech stack: SvelteKit, Directus, TailwindCSS, DaisyUI.

Contributed to the implementation of test routines with Vitest to ensure the quality of software solutions.

Yrkesakademin / Internship

APR 2022 - JUN 2022, Distans

Developed frontend and backend for a complete solution to an internal booking system for administrators.

Tech stack: JavaFX, Java and Spring Boot.

DEGREE

YrkesAkademin Sundsvall / System developer Java

SEP 2021 - JUN 2023, Distance/Sundsvall

Important to know

Software development is a process of constant improvement and upgrades and as a system developer I am in a continuous state of learning this means that if a programming language, a framework or a tool is required to apply for a job in your company is missing from my skill set it would be only logical to assume that I can learn it/them and set myself in production environment as I am used to do so.
