Before you start reading

Software development is a process of constant improvement and upgrades and as a system-developer I am in a continuous state of learning this means that if a programming language, a framework or a tool is required to apply for a job in your company is missing from my skill-set it would be only logical to assume that I can learn it/them and set myself in production environment as I am used to do so.

I am a Swedish citizen therefor I can relocate to / work in any country in the EU.

Relocating is not a problem as my family is open to move to any country in the EU.

About me

Results-oriented and adaptable full-stack developer with a strong passion for problem-solving and continuous learning.

Fluent in English, Swedish, and Arabic, I possess excellent communication skills that enable effective collaboration in both team-based and independent environments.
With a systems-developer degree from YrkesAkademin Academy and hands-on experience in creating advanced solutions, I am eager to leverage my skills and make a valuable contribution to your organization.

Education:

May-2023 Diploma in System-Development from YrkesAkademin Academy, Sweden.
Courses and Topics:
- Introduction to Java programming
- Object-oriented programming
- System architecture
- Databases
- Software Development Process
- LIA-1 (learning in a work environment) system development
- Enterprise Java Backend
- LIA2 Advanced System Development
- Enterprise Java Frontend

Skills:

- *System Development:*
    - Programming (analysis, problem-solving, and design)
    - Technical communication and documentation
    - Full-stack system development in Java and JavaScript / TypeScript
    - Software development processes, methods, and frameworks (agile focus)
    - Ability to independently develop system solutions
    - Participation in system development projects
    - Assessment, troubleshooting, adaptation, and takeover of existing solutions
    - Continuous self-improvement and competence development
    - Technical feasibility assessment for tasks or projects

- *Advanced skills in tools / frameworks:*
    - Java and Java EE
    - Relational databases (MySQL)
    - Spring, Spring Boot, Maven
    - HTML, CSS, Tailwind CSS
    - Git, GitHub, GitLab
    - Svelte, SvelteKit
    - React / Next.js
    - JavaScript / TypeScript, Node.js
    - Directus CMS

Experience:

Full-stack Developer | Jahopp AB | trianee
Developed advanced solutions as a full-stack trainee at Jahopp AB, a leading company in creating and managing learning platforms.

Collaborated with a team to deliver high-quality front-end and back-end solutions. Adapted quickly to the company's routines and frameworks, utilizing technologies such as Svelte, SvelteKit, Tailwind CSS, and headless CMS.
Contributed to the implementation of testing routines with Vitest to ensure software quality.
